Letter of Recommendation (Mr. Driton Ajeti)

This letter provides confirmation that **Mr. Driton Ajeti** worked as a Network Technician for DSN, specializing in WLAN equipment. **Mr. Ajeti** started working with the company April 2004. He departed from the company June 2011.

In my capacity as CEO of Deployed Soldiers Network, over this period I observed many times how **Mr. Ajeti** skills and expertise helped the company solved problems and forge ahead in difficult situations. He repeatedly showed the ability to undertake and complete tasks in many areas for our customers, etc.;

- * Planning and execution of the network configuration
- * Consulting in development of test environments
- * Coordination and training with part time employees
- * Superior customer service skill set

Mr. Ajeti works well independently, but is also very group oriented, possessing commendable team and communications skills. He maintains a clear overall vision and achieves the objectives efficiently and effectively. His relationships with the members of the management team and our customers were highly professional.

Mr. Ajeti dedication as a strong team member was his most valuable asset toward DSN's project objectives. And it will be on any other team that his qualifications for employment are presented to. His absence on this team will be truly missed.

Emmett Pruitt
